Section 4 - Policies and Procedures Associated with Programmes of Education & Training

Subject:	Policy on Programme Design and Development		
Date Approved by Board of Directors:		February 2021	
Applicable QQI Core Standard	Programmes of Education and Training		
Policy Version	1/2021	Date due for Revision	February 2024

CONTEXT

This policy has been designed to ensure that risks associated with the development of new programmes have been considered and that the programmes being considered for development align with the mission, vision and values of the College.

The development of new programmes is vital to the overall success of the College which allows for future growth and development. It is important that the College has the capacity to respond to the needs of society by providing Higher Education programmes that are fit for purpose and ensures that there is both a legitimate educational need and demand for proposed programmes, that they are educationally and commercially viable and that the College has the resources to allow for the development and delivery of programmes in line with the Quality Assurance Framework. The overall principles of programme design, development and subsequent presentation for validation must meet the requirements set by Qualifications and Quality Ireland.

POLICY STATEMENT

The College will develop Higher Education Programmes designed to address the requirements and guidance as set out in the QQI Core Validation Policy and Sector Specific Criteria for education and training programmes in the Independent/Private Voluntary Sector (2016).

SCOPE

Applies To	Staff	Students	Both	
	✓			
Responsible for Implementation	Registrar			
Responsible for Monitoring & Review	Vice President (Corporate Affairs)	Vice President (Academic Affairs)	Registrar	Quality Assurance & Enhancement Officer
		✓		

DEFINITIONS

A number of QQI documents set out the definitions of the types of award that may be considered when designing or developing programmes to be presented for validation. These are available at www.qqi.ie and should be referred to. However, in summary design and developmental teams will be cogniscant of the following when developing programmes.

Major awards: Are nationally and internationally recognised qualifications which satisfy the full requirements for a specific framework level on the National Framework of Qualifications NFQ. Major awards include Higher Certificate, Ordinary Degrees, Honours Degrees, Higher Diplomas, Post Graduate Diplomas, and master’s Degrees.

Minor awards: Recognise attainment of part of a major award and which have relevance as an award in their own right. All Minor Awards must be linked to a specified approved major award.

Supplemental awards: Are for learning which is additional to a previous award. Programmes leading to such awards may be described as refresher, updating or continuing education and training, with respect to an occupation or profession. Such supplemental awards are not at a higher level than the initial award.

Special-purpose awards: Are made for specific, relatively narrow, purposes. They may comprise learning outcomes that also form part of major awards. However, where there is a need for separate certification of a set of outcomes, there should be a separate award. For example, there may be a statutory obligation for certain workers to have certification of their competence in specific areas. Special–purpose awards need not be linked to a major award. Special purpose awards derive their currency from the particular context of their use, such as individual fields of employment. Special purpose awards may or may not be part of the learning outcomes for a major award. Minor, Special Purpose and Supplemental awards may be devised for any level in the National Framework of Qualifications (NFQ).
